

PROJECT DOCUMENTATION

Script-Controlled ACL – Restrict Record Access Based on Field Value

PHASE 1 – PLANNING & REQUIREMENTS

Date	30 September 2026
Team ID	SWTID-2026-8983
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Objective

This phase defines the access-control requirement, identifies the field value used for restriction, and documents the expected behavior of the Script-Controlled ACL solution.

Team & Responsibility

Team Member	Responsibility
NITHYA SREE S	Team Lead / Planning & Coordination
RAMASRI D	Requirement Analysis
PRATHISHA S	ServiceNow Configuration Planning
MEGALA M	ACL / Script Logic Planning
MANJARI T	Testing & Documentation Planning

Requirements

S.No	Requirement	Priority
1	Restrict record access based on a selected field value.	High
2	Use a scripted ACL condition to validate the current user's access.	High
3	Allow authorized users to view records while blocking unauthorized access.	High
4	Test both permitted and restricted scenarios.	Medium

Planned Workflow

Step	Planned Activity	Expected Output
1	Identify target table and field.	Access-control requirement finalized.
2	Define allowed and restricted field values.	Access rules documented.
3	Create/plan the Script-Controlled ACL.	ACL logic ready for implementation.
4	Prepare test users and records.	Test data ready.

Phase 1 Completion

Item	Status
Requirements identified	Completed
Team responsibilities assigned	Completed
ACL rule planned	Completed
Test scenarios prepared	Completed
